KEEP OUT OF REACH OF CHILDREN** DANGER - POISON ****DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This labeling must be in the possession of the user at the time of pesticide application. Refer to the EPA registered product label for chemigation instructions.

CROP	INSECT	PINTS/ACRE	REMARKS
Carrots (grown for seed)	Aphids, Lygus bugs	1½ - 2	Permitted application methods: aerial and groundboom. Apply 1 ½ to 2 pints per acre by aerial or ground equipment in sufficient water for complete coverage but not less than one gallon per acre. A second application may be made if necessary. Mechanical harvesting is required.
<ul style="list-style-type: none"> • Do not make more than 2 applications per crop cycle. • Minimum of 14 days between applications. • Do not apply within 21 days of harvest. • Restricted entry interval (REI) = 15 days 			

Precautions: No portion of the treated field, including, but not limited to, seed, seed screenings, chaff, or root may be used for human or animal consumption.

Producers of carrot seed who use this product, or cause the product to be used in fields they operate, are required to inform, in writing, conditioners receiving seed produced on fields treated with this product. The producer is required to provide a copy of the labeling to the conditioner. Processed seed must be labeled "Not for human or animal consumption" at the processing plant. The processor must dispose of all seed screenings in such a way that they cannot be distributed or used for food or feed.

This product is toxic to bees exposed to direct treatment. Do not apply this product while bees are actively visiting the treatment area.

IMPORTANT: Before using this product, read and carefully observe directions, precautionary statements, Worker Protection Standards, and other information appearing on the EPA registered product label. This product is sold subject to the Conditions of Sale set forth on the container label.
