(If you do not understand the label, find someone to explain it to you in detail.)

**DIRECTIONS FOR USE**

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of pesticide application.
- Read the "Limitation of Warranty and Liability" in the label booklet for Willowood Paraquat 3SL before using.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.
- The complete DIRECTIONS FOR USE can be found on the currently registered EPA Stamped Label.
- Expiration Date: January 31, 2015 until December 31, 2020 or until otherwise amended, withdrawn, canceled, or suspended.

<b>CROP</b>	<b>DOSAGE (RATE PER ACRE)</b>	<b>COMMENTS</b>
ALFALFA GROWN FOR SEED	1.7 - 2.7 pts. (26.7 - 42.7 fl. oz.)	Use higher rates with dense canopies or heavy weed pressure. <b>Spray Volume:</b> <u>Ground application:</u> Use a minimum spray volume of 20-25 gallons per acre. Always add a nonionic surfactant containing 75% or more surface-active agent at 0.125% v/v (1 pint per 100 gallons), OR add a nonionic surfactant containing 50-74% surface-active agent at 0.25% v/v (2 pts./100 gallons) of the finished spray volume for ground applications. <u>Aerial application:</u> Use a minimum spray volume of 5-10 gallons per acre. Always add a nonionic surfactant at 0.25% v/v (2 pts./100 gallons) of the finished spray volume. <b>Method of Application:</b> Broadcast <b>Frequency and Timing of Applications:</b> One application is generally all that is needed. If a second application is needed apply at least 4 days prior to the planned harvest date. <b>Chemigation:</b> For use under this SLN label, do not apply this product through any type of irrigation system. <b>See "RESTRICTIONS/PRECAUTIONS" on next page.</b>

**RESTRICTIONS/PRECAUTIONS:**

- Do not enter or allow worker entry during the restricted-entry interval (REI) of 24 hours.
- Refer to spray drift information contained in the “Directions for Use” section for proper application to avoid off-target movement. Do not apply when weather conditions favor drift from treated areas.
- Do not make more than 2 applications per crop per year. The maximum annual application rate is 5.33 pts./A (85.3 fl oz.) per year.
- Do not harvest until at least 4 days after application.
- Do not apply by ground equipment within 25 ft. or by air within 75 ft. of lakes; reservoirs, rivers, permanent streams, marshes, natural ponds, estuaries, and commercial fish ponds.
- All alfalfa seed screenings must be disposed of in such a way that they cannot be distributed or used for human food or animal feed. The seed conditioner must keep records of screening disposal for 3 years from the date of disposal and shall furnish the records to the director immediately upon request. Conditioner disposal records must consist of documentation of on-farm disposal, disposal at a controlled dumpsite, incinerator, composter, or other equivalent disposal site and must include the lot numbers, amount of material disposed of, its grower(s), and the date of disposal.
- No portion of the alfalfa seed plant, including but not limited to green chop, hay, pellets, meal, whole seed, cracked seed, roots, bulbs, leaves, and seed screenings may be used or distributed for food or feed purposes.
- Alfalfa seed must bear a tag or container label which forbids use of the seed for human consumption or animal feed.
- Alfalfa seed may not be distributed for human consumption or animal feed.
