

Idaho State Department of Agriculture
Request for Recertification Course Accreditation

PLEASE READ CAREFULLY

Please take note of the following requirements when requesting recertification credits:

- A completed request for accreditation of a seminar shall be submitted on a form prescribed by the Department (see below).
- Such request shall be received by the Department not less than thirty (30) days prior to the scheduled seminar. Under exceptional circumstances, as described in writing by the person requesting accreditation, the thirty (30) day requirement may be waived.
- One credit will be assigned for every 60 minutes of accredited time. Private Applicators require 6 credits and Professional Applicators require 15 credits over the two year licensing period. Only authorized individuals shall have the authority to sticker the licenses.
- Credit will be given only for those parts of seminars that deal with the following pesticide subjects:
 - labels and labeling, including terminology, instructions, format, warnings and symbols;
 - safety factors and procedures, including protective clothing and equipment, first aid, toxicity, symptoms of poisoning, storage, handling, transportation and disposal;
 - laws, rules and regulations governing pesticides;
 - environmental considerations, including the effect of climate and physical or geographical factors on pesticides and the effects of pesticides on the environment, and the animals and plants living in it;
 - mixing and loading, including interpretation of labels, safety precautions, compatibility of mixtures and protection of the environment;
 - methods of use or application, including types of equipment, calibration, application techniques, and prevention of drift and other types of pesticide migration;
 - pests to be controlled, including identification, damage characteristics, biology and habitat;
 - types of pesticides, including formulations, mode of action, toxicity, persistence and hazards of use; and
 - chemigation practices involving the application of chemicals through irrigation systems.
