Subject: poisonous Japanese & English yew plants
Date: Wednesday, May 17, 2017 11:44:08 PM

I favor banning the sale of the plants (should be banned in the entire US). In the great state of Idaho we have wildlife everywhere. Even the heart of Boise has bear, mountain lion, elk, and deer on occasion. There is no reason to have these plants in our great state. Landscapers and home owners can use other plants. These plants should be removed, by whatever means possible.

Education is not enough, not removing this from being sold is not enough. Ban it and help people remove it from their yards.

BTW the article in the statesman had this quote, "**90 percent of Idahoans don't live in areas where wildlife roam.**". That is absolute crap. Wildlife roams everywhere. We need to do what we can to protect wildlife and this seems like such an easy thing to do. **DO not let Greed and the almighty dollar drive this decision.**

Add Japanese and English yew to the statewide containment list for noxious weeds. This would permit weed control efforts to target yews, but not require it. The sale of yews in Idaho would be banned. Goodrum said the Fish and Game League would prefer placing the yews on the control list, which requires active measures to reduce known populations.
