Chapter 22, Title 6, Section 22-605 (g), Idaho Code, "Any waste-derived fertilizer distributed as a single ingredient product or blended with other fertilizer ingredients must be identified as "waste derived fertilizer" by the registrant in the application for registration." A lab analysis that states the levels of nonnutritive metals, including but not limited to arsenic (AS), cadmium (CD), mercury (HG), lead (PB), and selenium (SE), must be included for each waste derived product. The following waste-derived fertilizers are **not subject to** this lab analysis requirement: biosolids, composted manure, bone and blood meal, fish emulsion, vegetative and food wastes, and **new** gypsum boards (not collected from demolition sites).

Please include one (1) copy of each current label(s) for new or revised products. Photocopies are acceptable.
