Good afternoon Marv,

The changes to the soil and plant amendment rule will be to update the reference in the rule of the American Association of Plant Food Control Officials (AAPFCO) standards manual to the most recent publication available next year (change the 2018 version listed to 2019). This change is made every year and allows for the most up to date standards, definitions, and terms to be used in the labeling process.

Best Regards,

Jared K. Stuart
Section Manager, Feed & Plant Services
Division of Plant Industries
Idaho State Department of Agriculture
