

Idaho State Department of Agriculture's Organic Product Profile (OPP)

Applicant/company name	Date	Name of Product Requested for Certification
		Percentage of Organic Ingredients %

Check which labeling category this product meets. Attach samples of labels for all products for which this Organic Product Profile is used.

"100% organic"
 "organic" (≥95% organic ingredients)
 "made with organic (ingredients or food group(s)) (≥70% organic ingredients)
 ≥70% organic ingredients

CALCULATING PERCENTAGE OF ORGANIC INGREDIENTS: If you are filling this form out electronically, then the form will automatically perform calculations. If filling it out on paper, you may calculate the organic ingredients by dividing the total net weight or volume of combined organic ingredients (excluding water and salt) by the total weight or volume of all ingredients (excluding water and salt).

LIST ALL INGREDIENTS INCLUDING NON-ORGANIC INGREDIENTS (IN DESCENDING ORDER OF PREDOMINANCE)	CHECK IF INGREDIENT IS CERTIFIED ORGANIC (✓)	SUPPLIER	CERTIFYING AGENT	HAVE YOU VERIFIED THAT THE NONORGANIC INGREDIENT WAS NOT PRODUCED USING ANY OF THE FOLLOWING (✓):			WAS AGRICULTURAL INGREDIENT NOT COMMERCIALY AVAILABLE IN ORGANIC FORM (✓)	CHECK IF NON-AGRICULTURAL INGREDIENT IS ON THE NATIONAL LIST AT §205.605 (✓)	WEIGHT OF INGREDIENTS (ENTRIES MUST BE IN THE SAME UNITS)	ORGANIC % OF INGREDIENT AS LISTED ON THE ORGANIC CERTIFICATE	ORGANIC WEIGHT
				GMOs	SEWAGE SLUDGE	IONIZING RADIATION				MUST DEFAULT TO 95% IF CERTIFICATE STATES "ORGANIC" BUT DOESN'T LIST THE ACTUAL PERCENTAGE PUT 0 IF NON-ORGANIC BUT APPROVED EXAMPLE: 95% ENTER AS .95 100% ENTER AS 1.00

Please Remember:

- Once this Organic Product Profile is submitted to ISDA, it will be reviewed and approved or denied. If approved, ISDA will issue your operation a copy of the form that is stamped "APPROVED". Until this stamped approval is received, the product formulation cannot be considered as organic. You must keep the approved version as part of your records.
- Current certificates for all organic ingredients listed must be submitted with this Organic Product Profile or already be on file with ISDA.
- For products labeled as "100% Organic", "Organic", or "Made with Organic (specified ingredients or food group(s))", documentation must be submitted with this Organic Product Profile which shows and verifies that the listed ingredients were not produced using:
 - Excluded Methods (e.g. Genetically Modified Organisms (GMO's)): A variety of methods used to genetically modify organisms or influence their growth and development by means that are not considered compatible with organic production. Such methods include cell fusion, microencapsulation and macroencapsulation, and recombinant DNA technology (including gene deletion, gene doubling, introducing a foreign gene, and changing the positions of genes when achieved by recombinant DNA technology). Such methods do not include the use of traditional breeding, conjugation, fermentation, hybridization, in vitro fertilization, or tissue culture.
 - Ionizing radiation, as described in Food and Drug Administration regulation, 21 CFR 179.26
 - Sewage Sludge
 - Nonorganic agricultural substances used in or on processed products, except as otherwise provided in §205.606
 - Nonagricultural substances used in or on processed products, except as otherwise provided in §205.605
- For products labeled as “100% Organic” and “Organic”, handlers are required to source organic ingredients when commercially available. This is not required for products labeled as "Made with Organic...". However, ingredients must still be on the National List. Commercial availability is defined as the ability to obtain a production input in an appropriate form, quality, or quantity to fulfill an essential function in a system of organic production or handling. If you are using products listed in §205.606 or applicable products in §205.605, attempts to source organic versions and/or reasons that the organic version is not of the necessary form, quality, or quantity, must be submitted to ISDA annually.
- Products labeled "Organic" or "Made with Organic..." must not include organic and non-organic forms of the same ingredient, except that a non-organic ingredient in a product labeled “Made with Organic...” may contain organic and non-organic forms of the same ingredient. This ingredient must not be labeled “Organic” on the ingredient statement or be counted in the calculation of the product’s organic %.
- Documentation must be submitted indicating if the salt used contains any additives, such as flow agents. If any additives or processing aids are present in the salt these additives must be listed on the National List.
