Apply a surface broadcast application with ground application equipment prior to weed emergence. Use 2.65 - 3.33 pints (2.5 to 3.2 lbs. ai) per acre on coarse and medium soils in a minimum of 20 gallons of water per acre. Apply Dual MAGNUM to the soil and incorporate uniformly into the top 3 inches of soil by cross-tillage (twice over field). For best incorporation, cross-tillage is desirable for maximizing distribution.

Seeds from treated fields may not be used for sprouts. No portion of the treated field, including seed, seed screenings, hay, forage or stubble may be used for human or animal consumption.

Producers of alfalfa seed who use this product are required to inform, in writing, conditioners receiving seed produced on fields treated with this product that the seed was produced on fields treated with Dual MAGNUM.
