To Whom It May Concern.

There is a requirement that I must point out to you in regards to the inspection and testing of pumps.

There must at all times be some readily available storage or means for the Weights and Measures Inspector to empty his 5 gallon test measures when making an official inspection and pump test for accuracy.

Hopefully, this condition can be cleared up in the near future, so there will be a minimum of inconvenience to your company as well as this agency.

Sincerely,

Lyman D. Holloway, Chief
Bureau of Weights and Measures
