

I don't see any reason to add anything to the noxious weeds list since no one takes care of the weeds already on the list, if you question what I am saying drive around the treasure valley and look at all the Poison Hemlock, Perennial pepper weed, Canada Thistle along the State highways, in the government drain ditches, we didn't use to have much hoary crest here in the valley, now it's all over the place, I could go on and on, it's totally discouraging to see noxious weeds on private and public lands, to list.
