Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.
(If you do not understand the label, find someone to explain it to you in detail.)

For use under this SLN, do not apply this product through any type of irrigation system

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and aquatic invertebrates and may cause reproductive effects in wildlife. Do not apply directly to water or areas where surface water is present or to intertidal areas below the mean high water mark. Runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment wash water.

DIRECTIONS FOR USE

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This Special Local Need (SLN) label and the federal label for this product must be in the possession of the user at the time of pesticide application.
- Follow all applicable directions, precautions, restrictions, and Worker Protection Standard requirements on the main product label for **COMITE®**, EPA Reg. No. 400-104, and on this SLN label.
- Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State Tribe, consult the agency responsible for pesticide regulation.

CLOVER GROWN FOR SEED ONLY

For the control of the two-spotted spider mite.

For ground applications use 32 to 48 fl.oz/A of **COMITE®** in 25 to 40 gallons of water per acre. For air applications use 32 to 48 fl.oz/A of **COMITE®** in a minimum of 10 gallons of water per acre.

Restricted Entry Interval: Observe a Restricted Entry Interval (REI) of 9 days.

NOTES

All clover seed grown or conditioned as a non-food or non-feed site in the state of Idaho shall bear a tag or a container label which forbids the use of seed for human consumption or animal food. It shall be the grower's responsibility to notify the processing plants of any seed crop treated with **COMITE®**

No clover seed grown or conditioned as a non-food or non-feed site in the state of Idaho may be distributed for human consumption or animal feed.

The feeding of treated foliage, clover trash, or seed screening to livestock and the grazing of treated fields is prohibited.
