Subject: Seed Management area Rule changes

CAUTION: This email originated outside the State of Idaho network. Verify links and attachments BEFORE you click or open, even if you recognize and/or trust the sender. Contact your agency service desk with any concerns.

Lloyd,

Good Morning! I wanted to touch base with you about the potato seed management area rules. I do think we need to update the Disease and Pest of concern. IDK the best way for it to be stated... it be better to have it say something like:

Any known introduction of diseases and pests of concern listed in this section as well as in those listed in seed certification rules is prohibited. Due to the continuous discovery of new diseases in potatoes this list will be incomplete, but should be used to help protect the seed industry from the introduction of any new discovered diseases from being brought in from out of seed management areas.

As I believe the only language that should be removed is under diseases and pest of concern regarding powdery scab. I absolutely think aphids should be included under 05,, possibly all aphids, not just green Peach Aphid. They should be subject to control if needed or necessary. And maybe insects should have it's own pest category for control because we all know they are there, but have a means to control them if an egregious infestations is found. There are other diseases arising that hopefully the seed industry would be protected from but I am not sure if they need to be listed such as: Potato Mop Top- Tobacco Rattle virus, and Potato wart... maybe we can talk about that
Wednesday....

I am hoping there will be more on the call this week. A lot of people were unaware of the meetings, so hopefully we will get more input.

Thanks!

Laura

Andrea Thompson reviewed:

- Subchapter B – Seed Potatoes Crop Management.
Proposed change to section 230 removes all regulated articles except potatoes and section 260-261 marked for removal.
Ms. Pickard advised keeping all regulated articles.
Mr. Knight asked what the industry expectation of implementation is when the department is not actively enforcing. Further explained there are some opinions that the department has too broad, heavy authority.
Ms. Pickard noted there is a rare incidence but maintains the need and ability of department to respond with this language being kept there.
Mr. Westra noted many of the regulated articles are not enforceable because some pests fly into the regulated areas.
Ms. Pickard responded it is broad for a reason and leaving that language allows for control when necessary. Suggested addition of language to Section 240 to clarify when department action will be taken.
Mr. Blacker stated that some tools to mitigate pests might be lost in future.
Mr. Westra noted there is a lot of duplication under certification versus the rule language and differences in certification tolerance. Further, all certification rejections must be reported.

Mr. Knight noted the need for written comments and input from industry for the department to proceed with clear direction.

- Subchapter C – Bacterial Ring Rot.
No substantial changes proposed, only changes to names and abbreviation. Section 330 Mandatory Reporting. Open for discussion.
